Cool Fix

Bar's Leaks Cooling System Repair stops coolant leaks and antifreeze loss. One side includes a blend of carbon fiber sealer, leak-sealing liquid and stop leak treatment to prevent antifreeze loss. The other side adds system protection in the form of water pump lubricant, corrosion inhibitors and heat transfer agents.

For more information, call 800.345.6572 or visit www.barsleaks.com

Refill Solution

The Top-Refill system is a simple-to-use refillable spray can system for brake cleaner and other automotive chemicals.

The Top-Refill system is an automatic and compact solution for dispensing bulk chemicals in a shop environment.

The Top-Refill system is easy to install, has no electrical parts and functions entirely on compressed shop air.
